PROFESSIONAL SUMMARY

Passionate and detail-oriented Computer Science Engineering student with strong foundations in Full-Stack Development, Data Structures & Algorithms, and modern software development practices. Skilled in developing scalable web applications, RESTful APIs, responsive user interfaces, and secure backend systems using ReactJS, JavaScript, Node.js, Python, and C++. Experienced in building full-stack applications, automation systems, and network analysis tools with focus on performance optimization, clean architecture, and user-centric design principles.

EDUCATION

Model Institute of Engineering and Technology — MIET

2022 – 2026

Bachelor in Computer Science and Engineering — CGPA: 6.63

Jammu, J&K

EXPERIENCE

C/C++ Developer Intern — Programming Pathshala

June 2023 – July 2023

- Optimized complex data structures and algorithms to improve execution efficiency and solve advanced programming challenges effectively.
- Developed performance-focused C/C++ solutions by following clean coding practices, modular programming techniques, and efficient memory management.
- Worked on algorithmic problem-solving approaches involving recursion, sorting, searching, and dynamic programming concepts.

Web Development Intern — PrernaGati Technology

July 2024 – August 2024

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript to enhance user experience and accessibility.
- Built reusable frontend components and optimized UI responsiveness for improved performance across multiple devices and screen sizes.
- Collaborated on frontend development tasks involving interactive layouts, navigation systems, and modern web design principles.

PROJECTS

• Anabella Bot [GitHub]

- Built an AI-powered virtual assistant for email handling, calendar scheduling, and web automation tasks using intelligent workflow management.
- Integrated APIs and multi-agent workflows to automate productivity tasks, notifications, and scheduling operations efficiently.
- Designed scalable backend logic and automation pipelines to improve task execution efficiency and system reliability.

• KalaKart [GitHub] [Live Demo]

- Developed a full-stack artisan e-commerce platform using ReactJS, Node.js, and MongoDB with scalable frontend and backend architecture.
- Implemented JWT-based authentication, role-based access control, shopping cart, payment integration, and real-time order tracking features.
- Built responsive user interfaces and optimized RESTful APIs to improve platform scalability, usability, and customer experience.

• Deep Packet Inspection (DPI) [GitHub]

- Built a Deep Packet Inspection (DPI) tool in C++ for monitoring and analyzing real-time network traffic data efficiently.
- Implemented packet parsing functionalities for Ethernet, IP, TCP, and UDP protocols using PCAP libraries and packet inspection techniques.
- Analyzed HTTP, HTTPS, and DNS traffic using Wireshark and PCAP tools for protocol-level monitoring and traffic analysis.

TECHNICAL SKILLS

• **Languages:** Python, JavaScript, C/C++

Frontend Technologies: HTML, CSS, ReactJS

Backend Technologies: Node.js, REST APIs

Developer Tools: Git, GitHub, Wireshark, PCAP, CMake

Soft Skills: Problem-Solving, Communication, Team Collaboration

CERTIFICATIONS

- Introduction to Python
- Introduction to Artificial Intelligence
